

MISSOURIANS AGAINST HUMAN CLONING

the deception

What is being billed as the Missouri Research and Cures Initiative is confusing and misleading. While the amendment claims to ban human cloning, it actually does just the opposite. They claim they want to insure Missouri patients have access to cures however...

the truth

the wealthy proponents of this amendment are spending tens of millions of dollars to amend our constitution to protect research that is already legal and have shown no interest in supporting more promising adult stem cell research.

Why? Because the amendment is about patents not patients

5 REASONS TO **VOTENO**

THE CLONING AMENDMENT...

1 constitutionally protects human cloning:

This Amendment would create an unlimited state constitutional right to clone and destroy human life at the embryonic stage for experimentation using the same process which created Dolly the sheep.

2 exploits and endangers women:
The Cloning Amendment would require thousands of vulnerable young women to undergo super-ovulation to produce the eggs necessary for this research; up to 35% of these women experience health consequences, many serious, and some will even die.

3 grants public money for private profit:

By providing one industry with constitutional protection this cloning amendment grants political insulation and public money...all for private profits.

4 is intentionally deceptive:
Cloning proponents have redefined terms in an effort to mislead voters, deliberately using political double talk instead of accepted scientific definitions.

5 is funded by elites:
One wealthy couple has contributed 95% of the funding in an attempt to buy a constitutional amendment which would allow their research institute to tap into millions in public funds.
