

## Know the *Truth* about Amendment 2

### Protects Human Cloning

What is being billed as the Missouri Research and Cures Initiative is confusing and misleading. Missourians are being **deceived** into believing Amendment 2 bans human cloning when it actually constitutionally protects the right to clone humans for the sole purpose of destroying them.

- Somatic Cell Nuclear Transfer (SCNT) is a technical term that describes the process for creating a cloned human embryo. This is the same procedure that produced "Dolly the Sheep" and the same procedure supporting scientists would use to clone humans. Every textbook and scientific journal defines SCNT as **CLONING**.
- While sect. 6.2.of the initiative claims to ban human cloning, it is merely a **deceptive word game**. All it actually bans is the placement of an already cloned embryo in a womb, NOT human cloning. It **PROTECTS** the right to clone humans and grow them in a petri dish; a process known as **Cloning**.
- Once human embryos have been cloned the Amendment mandates they be destroyed after 14 days so supporting scientists can experiment on them.

Amendment 2 is deceptive in that it would constitutionally protect the right of supporting scientists to **CLONE and Destroy**.
